

CIRQ-LIFE

A Doctor's Work

The invaluable contributions of DR. SAMUEL K. YUE M.D. to the field of biotechnology benefits more and more people each day.

After more than a decade of intensive research, Samuel K. Yue M.D., founder of Hy-Sun Biomedical Limited, made a groundbreaking discovery. Specialized in pain management and anti-aging, he determined that colostrum extract contained large amounts of polypeptides, which can be used to improve microcirculations and balance glandular secretions.

With this newfound knowledge, he established his company, which now manufactures and distributes the world-renowned CirQ-Life. The biotechnology company is committed to providing the highest quality products. It specializes in developing and manufacturing high-quality nutraceutical food supplements.

“Our mission, simply put, is to help people who want to be more healthy,” says Dr. Yue.

Making the world better

Colostrum extract is the key ingredient in CirQ-Life healthcare products. It has repeatedly yielded significant,

positive results for health improvement. Hy-Sun Biomedical produces the unique component exclusively in-house.

The company has since put effort in creating information campaigns aimed at communicating the product's benefits to doctors as well as the general public. “Since our findings are new, it is given that less people understand. We need to do all we can to make sure that people get the opportunity to try our products.”

While CirQ-Life products can provide significant and rapid effects, they are more affordable especially when compared with similar products. Hy-Sun Biomedical is currently planning a new production line in India. With it, the company can increase production and lower costs significantly in 2016.

Dr. Sam intended to create the brand with hope that his breakthrough formu-

la, found in CirQ-Life health products can serve as a vital key to wellness, and bring about better living for everyone. He has devoted more than thirty years to improving the quality of life of patients and customers; the brand is a testament to his dedication. ■
